

6 April 1954

Dear Dr. Lederberg,

Just a hurried note late at night amidst much unfinished  
ward work.

Enclosed is a letter from a gentleman from the Univ of  
Oklahoma concerning the copper bug. I am referring it to  
you for a number of reasons. First if you are pursuing  
these matters there is little point in his doing so -  
If you are not you might let him know with what tips you  
have gathered in this business lately.

Also I would love to hear myself where matters stand as far  
as this is concerned with you. I will be leaving for  
Yale in a couple months and still have that stubborn hunch  
about pursuing the DNA in these two organisms.

Hope to see you before too long  
Sincerely yours,

*Larry.*

Larry Weed.
